Roblox is a 3D web and mobile game development platform. For Windows PCs, the Roblox game engine and tools are available to create cross-platform games or for use with the Studio toolset to create games for the web and mobiles. Roblox developed the game development platform based on JavaScript & Python and includes a scripting language that developers use to create games and game objects. Roblox has platform and web game development tools based on HTML5 and the Unity game engine and includes a drag and drop game creation toolset. The web game development environment allows players to play at home with a local web server or with peers online through one of the browser plugins. Roblox Corporation was launched in late 2004 by Roblox's co-founder David Baszucki. It was later owned by a group of investors led by entrepreneur and angel investor Craig Zucker. The name Roblox was a combination of the words "robot" and "block". Roblox was one of the first popular free online gaming platforms where people can develop games using programming language Lua. Roblox is free to play but allows players to buy Robux which can be used to buy in-game items. Robux can be earned by completing missions. Users have the ability to connect to the Roblox platform through a network of servers and then control a computer-like character or any other object inside the game. The game platform is created using the Lua programming language and players can download new games created by other players online. Roblox supports multiple platforms such as iOS, Android, Windows and desktop computers. Roblox Corporation, headquartered in San Mateo, California, has over 170 employees. The number of active users is rapidly increasing worldwide. In the United States, more than 30 million people are estimated to play games on Roblox.com, including approximately 80 percent of American children under the age of 16. In October 2015, Roblox unveiled the Roblox Studio, a suite of plug-in software development tools based on the Unity game engine, and included with Roblox Studio is an HTML5 game development editor. On July 11, 2016, Roblox announced the launch of the Roblox Academy, a virtual school that offers online courses in programming and game development, web development, animation and 3D graphics. Roblox's headquarters are located at 300 Lindbergh Drive,
